K562 → RPE1: matched ridge CV
1e−3
Full aligned-gene mean squared error
Incremental recipient budget
Discrepancy extension
Classical worst query
Classical mean query
Fixed grid
Zero effect
Assessment noise estimate
K562 → RPE1: separate conditional scopes
Query identities vs worst
IID assessment cells vs worst
Guide/batch stratified cells vs worst
Technical batch sensitivity vs worst
Query identities vs mean
IID assessment cells vs mean
Guide/batch stratified cells vs mean
Technical batch sensitivity vs mean
Extension minus comparator: normalized error area 1e−4
RPE1 → K562: matched ridge CV
RPE1 → K562: separate conditional scopes
Extension minus comparator: normalized error area 1e−5
